PROFILE SUMMARY

Analytically driven Master's candidate in Big Data Analytics with a solid foundation in Advanced Statistics. Proficient in Python, SQL, R, and Tableau, with hands-on experience in machine learning and a foundational understanding of deep learning and AI concepts. Adept at engineering large-scale datasets, validating predictive models, and translating complex data into actionable business intelligence. Seeking a Data Science role to apply analytical skills and data-driven problem-solving to optimize decision-making.

SKILLS

- Programming & Languages:** Python (Pandas, NumPy, Scikit-learn, Matplotlib), SQL, R
- ML & AI:** Predictive Modelling, Time Series Forecasting, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG)
- Statistics & Analytics:** Exploratory Data Analysis (EDA), Feature Engineering, Regression & Classification, Causal Inference, Model Evaluation
- Data Visualization:** Tableau, Power BI, Seaborn
- Frameworks & Infrastructure:** Jupyter, Tensor-flow, Scikit-learn

EXPERIENCE

AI-ML Engineer Intern | Sun Pathology Laboratory & Research Institute **Aug 2026 – Present**

- Engineered an AI-powered voice agent for Earthora, designing conversational workflows to automate customer interactions, product inquiries, and information retrieval through a voice-based interface.
- Developed and integrated a production-grade customer web platform for Earthora, supporting product discovery, ordering, customer inquiries, and access to company and product information in collaboration with the engineering team.

Data Science Intern | Petpooja Co. — Prayosha Food Services Pvt. Ltd. **Dec 2025 – Jul 2026**

- Conducted rigorous structural quality checks, systematically identifying and resolving data anomalies to ensure highly reliable and consistent inputs for downstream machine learning applications.
- Engineered analytical features and validated predictive model outputs against established baseline metrics, rigorously evaluating overall performance to guarantee high prediction accuracy prior to final product integration.

Big Data Analysis Intern | YHonk India Pvt. Ltd. **Mar 2025 – Nov 2025**

- Cleaned, structured, and analyzed continuous, high-volume audio sensor data streams—resolving anomalies and inconsistencies—to significantly improve the accuracy of detecting noise occurrences within designated No Honking Zones.
- Designed and deployed dynamic geo-visualizations using Folium, map polygons, OpenStreetMap, and the Google Maps API to spatially map noise hotspots and support data-driven operational decisions.

EDUCATION

Master of Science in Big Data Analytics St. Xavier's College (Autonomous), Ahmedabad	2024 - 2026
Post Graduate Diploma in Data Analysis B. K. School of Professional & Management Studies, Ahmedabad	2023 - 2024
Bachelor of Commerce in Advance Statistics H. L. College of Commerce, Ahmedabad	2020 - 2023

PROJECTS

- **Retail Decision Intelligence Operating System (R-DIOS)** **Jan 2026 – Apr 2026**
 - Architected an end-to-end analytics pipeline for cleaning, transforming, and processing enterprise retail datasets.
 - Developed sales forecasting and causal inference models to identify demand drivers and support inventory planning decisions.
 - Built a context-aware AI assistant using Python, LangChain, and Retrieval-Augmented Generation (RAG) for natural language interaction with business intelligence systems.

Tech Stack: Python, LangChain, RAG, Machine Learning, Forecasting

- **Precision Marketing via Causal Inference (Uplift Modeling)** **Feb 2026 – Mar 2026**
 - Developed a causal inference framework using CausalML to identify persuadable customers and optimize marketing expenditure.
 - Implemented S-Learner, T-Learner, and X-Learner architectures and evaluated uplift performance using custom Qini Curves and AUUC metrics.
 - Applied SHAP explainability techniques to interpret model behavior and support business decision-making.

Tech Stack: Python, CausalML, SHAP, Machine Learning

- **AI-Powered Meeting Intelligence Platform** **Oct 2025 – Nov 2025**
 - Built an AI-powered NLP pipeline that processes meeting audio and automatically extracts action items, priorities, and deadlines.
 - Analyzed real-world meeting conversations from the AMI Corpus and transformed unstructured discussions into structured insights.
 - Designed an analytics dashboard for visualizing key meeting outcomes and tracking task ownership.

Tech Stack: Python, NLP, Speech Processing, Data Visualization

CERTIFICATES

- Artificial Intelligence Fundamentals - IBM SkillsBuild, 2026
- Retrieval-Augmented Generation for Enhanced AI Outputs - IBM SkillsBuild, 2026
- Data Science Foundations - Level 1 - IBM, 2026
